Hi I'm [Miriam Ramos Warth](#). I have taught Spanish for many years. In all this years I've heard parents asking: How can my child practice more Spanish at home? How can I help? Etc...

The Internet has many free Spanish resources for parents and teachers but to find the right activity, game or song it's sometimes a bit of a challenge and time consuming.

I want to share some websites that I think are age appropriate and with good content to help children to practice Spanish at home.

I'm happy to present ***The 10 Best Free Spanish Websites for Kids***. I hope this will be a useful tool for you to engage your child/students in learning Spanish

Please check the site before you present it to your child/ students.

Also all the websites were free at the time I selected them. I can't guarantee that they will be free at the time you are reading this e-book.

Parents and teachers: if you click at the website's name you will go directly to the website.

If you have any questions or comments please contact me at www.elsse.com

This e-book is provided free of charge.

Have fun!!!!

Thanks

Miriam Ramos-Warth

Study Spanish is a good site for Middle School and up. They explain very well the Spanish grammar. They have many exercises to practice each topic. They have 9 units.

I took this from the website.

“Find topics in left sidebar. Frankly, when most people think of "grammar" they don't get very excited. But grammar can teach you something in minutes that might take days to figure out by immersion alone”

“Grammar is your friend! We believe in grammar, and we include it in our method. But let's be honest. Studying Spanish grammar will not make you fluent. To reach a conversational level you need a complete course.....“

Lyrics Training is an easy and fun method to learn and improve your foreign languages skills like

English, Spanish, Portuguese, French, Italian, Dutch and German through the music videos and typing the lyrics of the songs. You can choose from an easy activity to a hard activity.
